

Foundation to Enhanced Clinical Practice in Primary Care

**Module 1:
Medicines
Optimisation**
Establishes professional
foundations, scope of
practice, and familiarity
with NHS systems.

**Module 2:
Clinical
Knowledge
& Application**
Develops skills in managing
complex patients with
polypharmacy and
interpreting clinical data.

**Module 3:
Medicines Safety**
Focuses on reducing
medication-related harm
through safety alerts and
significant event analysis.

**Module 4:
Effective
Consultations**
Builds competence in
patient consultation,
communication, and shared
decision-making.

**Module 5:
Medicines
Information**
Teaches how to manage
medication queries using
reliable sources to provide
accurate responses.

**Module 6:
Audit & Quality
Improvement**
Equips learners to
contribute to and lead
quality improvement
projects and audits.
